THE AI RESUME BUILDER

Create Resumes, LinkedIn Profiles & Job Applications That Actually Get Responses

By Joy Roy

A Note from the Author

I wrote this book as a career coach. Every technique here was tested in real conditions — as a student, with real deadlines. Nothing here is theoretical.

Let us get to work.

-- Joy Roy

Contents

Ch 1 The Hiring Problem	3
Ch 2 Building the Resume	4
Ch 3 LinkedIn Optimization	5
Ch 4 Cover Letters	6
Ch 5 The Application System	7

The Hiring Problem

Employers get 250 applications per role. Yours needs to stand out in the pile. This chapter explains why most student resumes fail and what actually works.

ATS systems reject 75% of resumes before a human reads them. File format, keyword matching, and formatting matter as much as content.

1. Why Resumes Fail

Most student resumes are lists of duties. Employers want evidence of impact. The difference: 'Did X, resulting in Y.'

- Start with this technique in your current course
- Practice for 15 minutes daily throughout the week
- Note what works and what does not

QUICK WIN

Try this today: Take one the hiring problem prompt from this chapter and use it on a real task.

2. The ATS Filter

Every large company uses software to pre-screen resumes. This chapter reverse-engineers what those systems actually look for.

- Start with this technique in your current course
- Practice for 15 minutes daily throughout the week

- Note what works and what does not

ACTION

Before moving to the next chapter, implement one the hiring problem technique in your current work.

3. Format Rules

One page. No photos. Clean headings. Standard fonts. These simple rules eliminate 80% of rejection risk.

- Start with this technique in your current course
- Practice for 15 minutes daily throughout the week
- Note what works and what does not

Building the Resume

The reverse-engineered formula for resumes that pass ATS and impress humans.

Start with the job description. Extract keywords. Build every bullet around those keywords.

1. The Bullet Formula

[STRONG VERB] + [WHAT YOU DID] + [QUANTIFIABLE RESULT]. 'Led' not 'was responsible for.' 'Reduced' not 'helped reduce.' '40%' not 'significantly.'

- Start with this technique in your current course
- Practice for 15 minutes daily throughout the week
- Note what works and what does not

QUICK WIN

Try this today: Take one building the resume prompt from this chapter and use it on a real task.

2. Project Bullets

No work experience? Projects count. Textbook projects almost count. Real projects with real users count the most.

- Start with this technique in your current course
- Practice for 15 minutes daily throughout the week
- Note what works and what does not

ACTION

Before moving to the next chapter, implement one building the resume technique in your current work.

3. Skills Section

Be specific. Not 'familiar with Python.' 'Python: pandas, scikit-learn, matplotlib — 6 months of project experience.'

- Start with this technique in your current course
- Practice for 15 minutes daily throughout the week
- Note what works and what does not

LinkedIn Optimization

Your LinkedIn profile is your public resume. Most students neglect it. This chapter makes it work for you.

Recruiters search LinkedIn more than job boards. An optimized profile generates inbound opportunities.

1. Headline Formula

Not 'Student at XYZ.' Use: '[Field] Student | [Skills] | Building [What].' Lead with value, not your status.

- Start with this technique in your current course
- Practice for 15 minutes daily throughout the week
- Note what works and what does not

QUICK WIN

Try this today: Take one linkedin optimization prompt from this chapter and use it on a real task.

2. About Section

Three paragraphs: what you are learning, what you have built, what you are looking for. Specific > generic.

- Start with this technique in your current course
- Practice for 15 minutes daily throughout the week

- Note what works and what does not

ACTION

Before moving to the next chapter, implement one linkedin optimization technique in your current work.

3. Posting Strategy

One post per week. Share what you are learning. Show your process. Build visibility before you need it.

- Start with this technique in your current course
- Practice for 15 minutes daily throughout the week
- Note what works and what does not

Cover Letters

Almost nobody writes good cover letters. That is your opportunity.

A good cover letter is three paragraphs. It takes 15 minutes. It triples your callback rate.

1. The 3-Paragraph Formula

Paragraph 1: Why this company (specific). Paragraph 2: Why you (evidence-backed). Paragraph 3: What happens next (confident close).

- Start with this technique in your current course
- Practice for 15 minutes daily throughout the week
- Note what works and what does not

QUICK WIN

Try this today: Take one cover letters prompt from this chapter and use it on a real task.

2. Customization

Each cover letter must reference something specific about the company. A product, a value, a recent news item. Generic letters get generic rejections.

- Start with this technique in your current course
- Practice for 15 minutes daily throughout the week
- Note what works and what does not

ACTION

Before moving to the next chapter, implement one cover letters technique in your current work.

The Application System

Treat job hunting like a project. Track everything. Follow up. Quality over quantity. Five great applications beat fifty generic ones.

Build a spreadsheet. Track: company, role, date applied, contact, follow-up date, response.

1. Tracking

Spreadsheet with: Company, Role, Date Applied, Source, Status, Follow-Up Date.

- Start with this technique in your current course
- Practice for 15 minutes daily throughout the week
- Note what works and what does not

QUICK WIN

Try this today: Take one the application system prompt from this chapter and use it on a real task.

2. Follow-Up

Day 4 follow-up email: 'Hi [Name], applied for [Role] on [Date]. Very interested. Would love to discuss if there is a fit.'

- Start with this technique in your current course
- Practice for 15 minutes daily throughout the week
- Note what works and what does not

ACTION

Before moving to the next chapter, implement one the application system technique in your current work.

Quick-Reference Cheat Sheet

Print this. Stick it next to your workspace.
